

## Digital Asset Curation

Project Title	Digital Asset Curation
Project Summary	Identify and implement digital asset management systems and processes for high-quality photos, videos and 360 degree video used in foreign language instruction; identify new sources of digital assets.
Country	United States
Agency	Department of State
DoS Office	FSI/SLS/CSD
Post	N/A
Section	N/A
Number of Interns	1

## Project Description

We need someone to help us whip our digital assets into shape! We have roughly 10,000 photos which we use in our language instruction that we need organized. You will research digital asset management systems or digital media organizational frameworks to find candidate systems that meet our needs; help us develop a tagging schema; tag and organize our current photo library; identify photos that could be used commonly across languages and cultures; research additional viable sources of high-quality photos, videos and 360 degree videos that meet our needs and curate media from those resources.
